Block Compliance Policy on Policies

Policy lifecycle workflow aligned to February 18, 2026 PoP, separated by Document Owner and Compliance Governance interfaces.

Document Owner UI

Trigger
- Net new document
- Annual review
- Off-cycle change
- Retirement, deferment, or exception

Tollgate 1: Intake prep
- Check Block and subsidiary documents
- Confirm domain, scope, owner or delegate
- Submit new document or change request

Tollgate 2: Draft or revise
- Use approved Go/Policy template
- Draft in English and link related documents
- Retain clean and redline versions

Stakeholder review
- Legal, SMEs, and stakeholder reviewers comment
- Owner or delegate resolves feedback and keeps audit trail

Owner attestation
- Owner attests to content
- Provide clean copy, redline, and change summary for major rewrites

Implementation and awareness
- Maintain implementation plan
- Drive stakeholder communications, training, and awareness

Ongoing maintenance
- Annual review
- Off-cycle material or immaterial change
- Exceptions, deferments, and retirement requests

Compliance Governance / Policy Team UI (LogicGate SOR)

Inventory context
- LogicGate SOR holds current inventory
- Go/Policy and prior approvals available

Tollgate 1: Intake review
- Policy Team confirms in-scope document type
- Conflict check and reuse before net new drafting
- Confirm template and lifecycle path

Lifecycle controls
- Set domain, tier, cadence, metadata, and ownership
- Record in LogicGate SOR tracking

Tollgate 3: QC review
- Policy Team runs the PoP QC checklist
- Checks required sections, scope, retention, linked documents, approvals

Tollgate 4: Approval routing
- Route by tier
- Tier 1 board or committee path
- Tier 2 committee or leadership path
- Tier 3 leadership path

Publication and storage
- Publish to LogicGate SOR and Go/Policy
- Store approvals, redlines, and revision history

Governance reporting and maintenance
- Monthly reporting and CPC escalation as needed
- Track extensions, exceptions, renewals, archival, and retirement

Supporting Subagents

Review calendar monitor
- Flags due reviews and change triggers

Intake and conflict-check subagent
- Searches for overlap and recommends policy vs standard

Drafting and template-QA subagent
- Prefills required sections and checks style or hierarchy gaps

Review orchestrator and QC subagent
- Summarizes comments, tracks redlines, and validates checklist readiness

Approval-packet subagent
- Builds routing package, summaries, and evidence set

Publication and audit-trail subagent
- Verifies metadata, approvals, and upload readiness

Exception and deferment tracker
- Tracks approvals, renewal dates, and retention evidence

Annual review, off-cycle change, or retirement restarts the lifecycle

Source: Block 'Compliance Policy on Policies' (Last Approval Date: February 18, 2026). Subagents prepare, validate, route, and monitor, but final approvals remain with Owners, Compliance Leadership, CPC, and Boards per the PoP.
